

Event planning project - Draft wireframes

Start page (on load)

The diagram illustrates a web page layout with the following components:

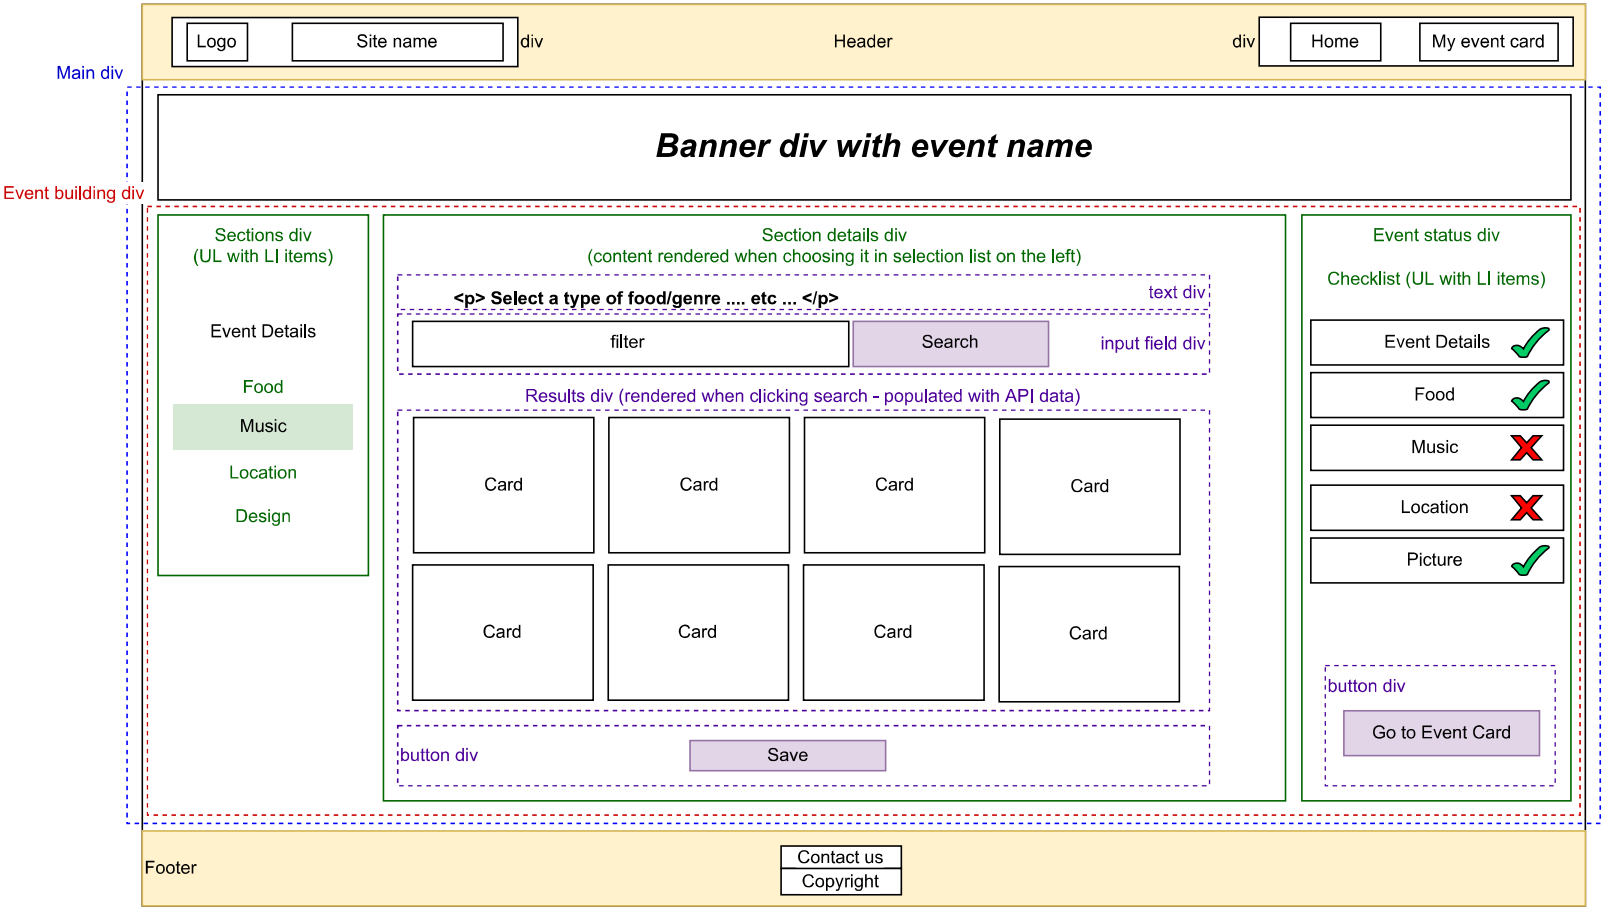

- Header:** Contains a `div` with `Logo` and `Site name`, and another `div` with `Header`, `Home`, and `My event card`.
- Main div:** The central content area, divided into two columns.
 - Left Column (Start page div):** Contains a `New event div` with the text `<p> Create a new event card - General introduction message </p>`, a text input field with the placeholder `Give your event a name to get started`, and a `Start` button.
 - Right Column (Existing event div):** Contains the text `Or returning to continue with an existing event?`, a text input field with the placeholder `Choose the event to continue`, a text input field with the placeholder `List of existing events in local storage to select from`, and a `Continue` button.
- Footer:** Contains `Contact us` and `Copyright` links.

Selection page (rendered with start button click)

The diagram illustrates a web page layout for building an event. The layout is organized into several key sections:

- Header:** Contains a logo, site name, and navigation links (Home, My event card).
- Main Content Area:**
 - Banner:** A large section at the top of the main content area, labeled "Banner div with event name".
 - Sections div (UL with LI items):** A sidebar on the left containing links for Event Details, Food, Music, Location, and Design.
 - Section details div:** The central area for event details, containing a form with fields for Event Organiser, Event Date, and Event location, a large text field for event description, and a Save button.
 - Event status div:** A sidebar on the right containing a checklist of items (Event Details, Food, Music, Location, Picture) with status indicators (checkmarks or X's).
- Footer:** Contains contact and copyright information.
